Cherry Berry Hosta*
Hosta 'Cherry Berry'

Plant Height: 10 inches

Flower Height: 18 inches

Spread: 18 inches

Spacing: 15 inches

Sunlight: ● ●

Hardiness Zone: 2a

Other Names: Plantain Lily, Funkia

Description:

Attractive hosta with elliptical, creamy-gold leaves, edged with green; medium sized plant with lavender flowers

Ornamental Features

Cherry Berry Hosta features dainty spikes of lavender tubular flowers rising above the foliage from mid to late summer. Its attractive small textured narrow leaves remain creamy white in color with showy green variegation throughout the season. The fruit is not ornamentally significant.

Landscape Attributes

Cherry Berry Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Cherry Berry Hosta is recommended for the following landscape applications;

Planting & Growing

Cherry Berry Hosta will grow to be about 10 inches tall at maturity extending to 18 inches tall with the flowers, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 15 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
