Description:

Large purple blooms with white watermark and yellow throat; midseason bloomer

Ornamental Features

Strutter's Ball Daylily features bold purple trumpet-shaped flowers with yellow throats and a white ring at the ends of the stems in mid summer. The flowers are excellent for cutting. Its grassy leaves remain green in color throughout the season.

Landscape Attributes

Strutter's Ball Daylily is an herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Strutter's Ball Daylily is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

Ann Arbor
734-332-7900
155 N. Maple at Jackson

Clinton Twp.
586-286-6100
44850 Garfield Rd.

Dearborn Heights
313-278-4433
22650 Ford Rd.

Eastpointe
586-771-4200
22501 Kelly Rd.

Royal Oak
248-280-9500
4901 Coolidge Rd.

West Bloomfield
248-851-7506
6370 Orchard Lake Rd.

Planting & Growing

Strutter's Ball Daylily will grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
