Ornamental Features

Snowstorm Glacier Blue Bacopa is covered in stunning powder blue buttercup flowers with gold centers along the stems from mid spring to late fall. Its small serrated round leaves remain green in color throughout the season.

Landscape Attributes

Snowstorm Glacier Blue Bacopa is an herbaceous annual with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Snowstorm Glacier Blue Bacopa is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Container Planting
- Hanging Baskets

Ann Arbor 734-332-7900 155 N. Maple at Jackson	Clinton Twp. 586-286-6100 44850 Garfield Rd.	Dearborn Heights 313-278-4433 22650 Ford Rd.	Eastpointe 586-771-4200 22501 Kelly Rd.	Royal Oak 248-280-9500 4901 Coolidge Rd.	West Bloomfield 248-851-7506 6370 Orchard Lake Rd.

Planting & Growing

Snowstorm Glacier Blue Bacopa will grow to be about 8 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Snowstorm Glacier Blue Bacopa is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. Because of its trailing habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
