Description:

Lovely coral pink blend trumpets with lime green centers that radiate yellow, and pie crust edges; great grassy texture and form; tetraploid; a spectacular color addition to the garden or border

Ornamental Features

Scottish Fantasy Daylily features bold coral-pink trumpet-shaped flowers with pink overtones, lime green throats and a yellow ring at the ends of the stems in mid summer. The flowers are excellent for cutting. Its grassy leaves remain green in color throughout the season.

Landscape Attributes

Scottish Fantasy Daylily is an herbaceous perennial with a shapely form and gracefully arching foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Scottish Fantasy Daylily is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

Ann Arbor 734-332-7900 155 N. Maple at Jackson	Clinton Twp. 586-286-6100 44850 Garfield Rd.	Dearborn Heights 313-278-4433 22650 Ford Rd.	Eastpointe 586-771-4200 22501 Kelly Rd.	Royal Oak 248-280-9500 4901 Coolidge Rd.	West Bloomfield 248-851-7506 6370 Orchard Lake Rd.

Planting & Growing

Scottish Fantasy Daylily will grow to be about 24 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
