Key Largo Astilbe

Astilbe simplicifolia 'Key Largo'

Plant Height: 15 inches

Flower Height: 3 feet

Spread: 24 inches

Spacing: 18 inches

Sunlight: ● ●

Hardiness Zone: 3b

Other Names: False Spirea

Description:

Soft, showy, pale pink plumes, rising above glossy leaves; perfect in a shady spot with dappled light; prefers moisture so water regularly for abundant flowers and nice foliage

Ornamental Features

Key Largo Astilbe has masses of beautiful plumes of pink flowers at the ends of the stems in early summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its ferny compound leaves remain dark green in color throughout the season.

Landscape Attributes

Key Largo Astilbe is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Key Largo Astilbe is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Ann Arbor
734-332-7900
155 N. Maple at Jackson

Clinton Twp.
586-286-6100
44850 Garfield Rd.

Dearborn Heights
313-278-4433
22650 Ford Rd.

Eastpointe
586-771-4200
22501 Kelly Rd.

Royal Oak
248-280-9500
4901 Coolidge Rd.

West Bloomfield
248-851-7506
6370 Orchard Lake Rd.

Planting & Growing

Key Largo Astilbe will grow to be about 15 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth. It is very fussy about its soil conditions and must have rich, acidic soils to ensure success, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Key Largo Astilbe is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
