## **Pink Sensation Hardy Water Lily**

*Nymphaea 'Pink Sensation'*

Plant Height: 12 inches

Flower Height: 24 inches

Spread: 5 feet

Sunlight: ☉ ●

Hardiness Zone: 4b

Other Names: Waterlily

### **Description:**

Large, stunning pink star-shaped flowers make this hardy water lily a beautiful addition to your pond; easy to care for; water lilies dislike moving water

### **Ornamental Features**

Pink Sensation Hardy Water Lily features showy fragrant semi-double pink star-shaped flowers with yellow eyes at the ends of the stems from early to late summer. The flowers are excellent for cutting. Its attractive large glossy round leaves emerge burgundy in spring, turning dark green in color with distinctive red spots the rest of the year.

### **Landscape Attributes**

Pink Sensation Hardy Water Lily is an herbaceous evergreen perennial with a low habit of growth, spreading atop the surface of the water. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It has no significant negative characteristics.

Pink Sensation Hardy Water Lily is ideally suited for growing in a pond, water garden or patio water container, and is recommended for the following landscape applications;

### **Planting & Growing**

Pink Sensation Hardy Water Lily will grow to be about 12 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 5 feet. Its foliage tends to remain dense right to the water, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. As an aquatic plant, it requires a suitable water garden environment and will benefit from special planting and ongoing care practices; consult one of our in-store experts for further details and instructions. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Pink Sensation Hardy Water Lily is a fine choice for the water garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when grown in outdoor pots and containers, aquatic plants like this one will require a special growing environment that meets their requirement for consistent moisture.
