Golden Moss Stonecrop *Sedum acre* 'Aureum'

Plant Height: 2 inches

Flower Height: 4 inches

Spread: 8 inches

Spacing: 7 inches

Sunlight: ☉ ●

Hardiness Zone: 3a

Other Names: Golden Mossy, Wall Pepper, Golden Carpet

Ornamental Features

Golden Moss Stonecrop is covered in stunning gold star-shaped flowers at the ends of the stems from early to mid summer. Its attractive tiny succulent needle-like leaves remain lime green in color throughout the year.

Landscape Attributes

Golden Moss Stonecrop is a dense herbaceous evergreen perennial with a ground-hugging habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Planting & Growing

Golden Moss Stonecrop will grow to be only 2 inches tall at maturity extending to 4 inches tall with the flowers, with a spread of 8 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 7 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil pH, but grows best in poor soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
